

## Play-Doh Recipe

### Instructions

In a large bowl, combine the following:

1 cup flour  
¾ cup salt  
1 tablespoon cream of tartar

In another bowl combine the following wet ingredients:

¾ cup warm water  
1 tablespoon glycerin (optional, but adds a nice texture)  
1 tablespoon of vegetable oil, such as canola oil

You can also experiment with a few drops of food coloring to dye your play dough. If you have essential oils on hand, such as lavender oil, you can add a few drops to your dough for a sensory treat.

Add your wet ingredients to your dry ingredients and mix together. Once wet and dry ingredients have been fully incorporated, take your dough out and knead it on a clean, dry surface, until the play dough begins to firm up. Let the play dough set for about five minutes. Once the dough has rested, it's ready to be used in any of your creations.
